

ABSTRACT OF THE DISCLOSURE

A recreational vehicle cover rests on the roof of a recreational vehicle. The cover is lightweight, portable and is easily installed or removed by two people. The cover requires no modification to the recreational vehicle. The recreational vehicle cover is capable of protecting the vehicle from harsh weather and heavy snow. The height of the cover above the recreational vehicle roof can be adjusted to adapt to roof top obstructions such as air conditioner, skylights and vents and also to accommodate uneven rooflines.
